

FULL MOUTH CHECK LIST

- Accurate and detailed impressions of approved provisionals.
- Face Bow of approved provisionals. Patient in upright position. The use of a leveler is suggested.
- Mounting of the upper arch in the office is recommended to avoid any movements during shipping.
- Aesthetic photos (as per Eurodent protocol).
- Impression of both arches.
- Bite relations taken in sections to preserve VDO, anterior record first, with posteriors in place and posterior record next with anteriors back in place. It will be done in this order to maintain accurate position of posteriors for cross mounting on individual articulator.

Written complete doctor's instructions to the lab.

A series of impressions two weeks apart is suggested. The anterior group first, the lower posteriors second and the upper posteriors third.

A 5% discount will be applied to the finished case if all items are received correctly.
